## 1 PROBLEM STATEMENT

Find the radius and the coordinates of the centre of the circle

$$\mathbf{x}^T \mathbf{x} = a^2 + b^2 \tag{1.0.1}$$

## 2 Solution

The general equation of a circle is given by

$$\mathbf{x}^T \mathbf{x} - 2\mathbf{c}^T \mathbf{x} + f = 0 \tag{2.0.1}$$

where **c** is the centre of the circle and  $\mathbf{r} = \sqrt{||\mathbf{c}||^2 - f}$  is the radius of the circle

Equation of circle given in (1.0.1) can be rewritten as

$$\mathbf{x}^{T}\mathbf{x} - 2\begin{pmatrix} 0\\ 0 \end{pmatrix}^{T}\mathbf{x} + (-(a^{2} + b^{2})) = 0$$
 (2.0.2)

Comparing (2.0.1) and (2.0.2) we get

$$\mathbf{c} = \begin{pmatrix} 0 \\ 0 \end{pmatrix} \tag{2.0.3}$$

$$f = -(a^2 + b^2) (2.0.4)$$

Then centre of the circle (1.0.1) is  $\mathbf{c} = \begin{pmatrix} 0 \\ 0 \end{pmatrix}$  and radius

$$r = \sqrt{||\mathbf{c}||^2 - f} = \sqrt{a^2 + b^2}$$
